Affordable custom touchscreen control for your sound system.

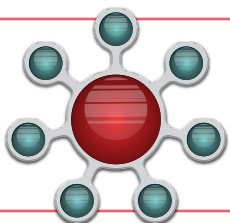

Easy to use, easy to program.

Though third-party controllers can interface with Rane's HAL, there is a less expensive and easier choice. The DR6 is a fully customizable touchscreen remote for the HAL family. It supports multiple pages or tabs and any set of levels, toggles, selectors and / or commands. Drag, drop and resize controls any way that's desired. Use your custom background images and logos in full color on the 7 inch-wide LCD.

Optional on-screen User Access logins secure management pages from public or staff use. A programmable ambient light sensor automatically dims the backlight in darker rooms.

The Control Page Designer in Halogen allows you to create one set of pages and use them in a web control design (for any smartphone, tablet or computer), DR6 display or both.
